

Your customers are under-insured, and when they claim, they can't find the proof.

Inheritable also helps customers keep their policy documents secure and organised in an easy to use App, at home or the roadside.

Inheritable helps customers inventory what they own, log the big purchases, and keep every policy in one place, so cover is accurate and claims are fast.

As a comprehensive Life Planner, the app becomes indispensable to our customers and keeps their insurance details current and organised for you.

Cover that reflects reality

Customers build an inventory of what they own, with photos and values, so sums insured are more accurate with a record of proof.

The right cover

New purchases and life changes surface in the app, the natural point to extend cover rather than lose the risk.

Claims without the scramble

Policies, receipts, photos and serial numbers stored together, ready the moment something is lost, stolen or damaged.

Your brand, always present

Co-branded in the customer's app and listed where they look for insurance, so you are who they renew with.

A secure place for your customers to organise and record everything they insure.

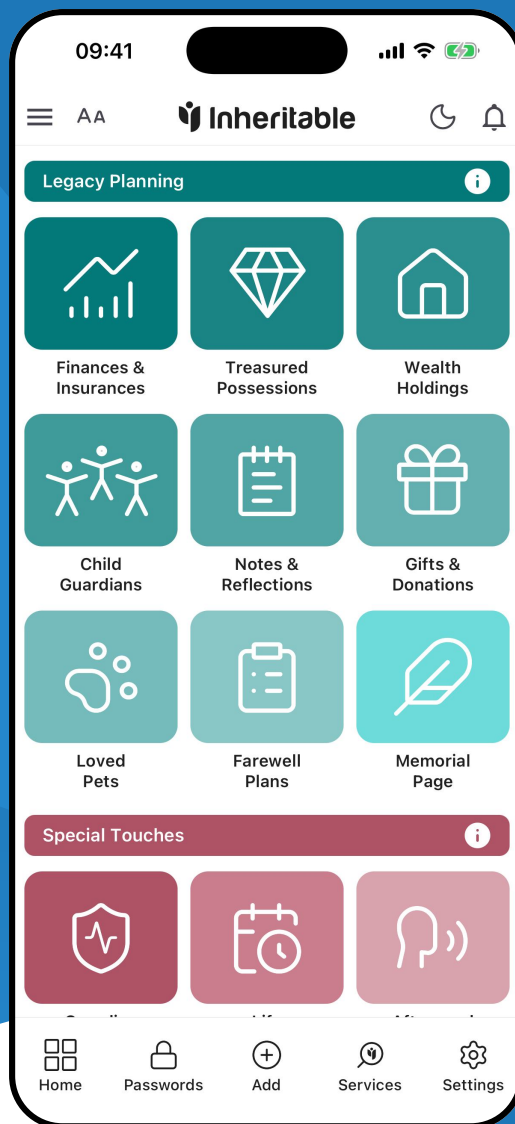

Secure Vaults

Service Directory

Simple to Use

Secure Vaults

Every policy, schedule, receipt and valuation kept encrypted and private, in one place.

Large purchase log

A new car, a watch, a laptop, logged as it is bought, with a note to make sure it is covered.

Digital Executors

Life and other policies are found and claimed, because the family knows they exist and where to look.

Possessions inventory

Customers list what they own, room by room, with photos and values. Right for accurate cover, and for passing on.

Quick claim access

Policy numbers, insurer contacts and proof of ownership at their fingertips, even at the roadside after an accident.

Information Hub

Plain-English guidance on cover, valuations and claims, positioning you as the helpful expert.

What we all need!

"This app is a game changer, simple to use and guides you on what vital information others will need."
